

VGC-301 Convection Vacuum Gauge Controller

- ◆ Wide measuring range lets you monitor your vacuum system from 1000 to 10^{-4} Torr with a single gauge.
- ◆ Includes two setpoints, user-selectable analog output, and RS232/485 interfaces.
- ◆ Analog output is configurable as a non-linear S-curve, log-linear, or user-scalable linear.
- ◆ Space-saving 1/8-DIN panel mount housing.
- ◆ Powered by universal 100-240 VAC or 12-30 VDC.

Description

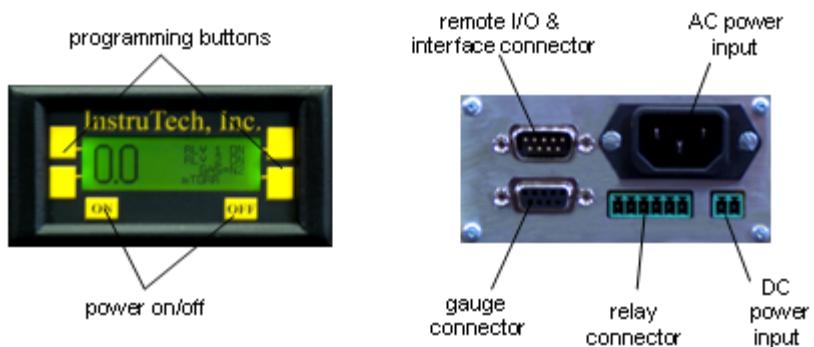

The VGC-301 vacuum gauge controller is a convenient and inexpensive power supply and readout instrument for a CVG "Worker Bee" convection vacuum gauge. The 1/8-DIN housing can be used on the bench top or mounted in a cutout in an instrument panel. The VGC-301 is powered by 12-30 VDC, or by its self-contained universal 100-240VAC supply.

Compatibility: Signals and relay functions are the same as found on similar Convection gauge controllers from other manufacturers. The VGC-301, CVG gauge, and gauge cable can be directly interchanged with Granville-Phillips 375 Controller, 275 Convectron® gauge, and gauge cable. (Remote interface, relay, and power connectors are different.)
